

✂ Clip for use with 2010 Ghost FLUZ map

## Signs of Change

**Ghost**  
Forest Land Use Zone

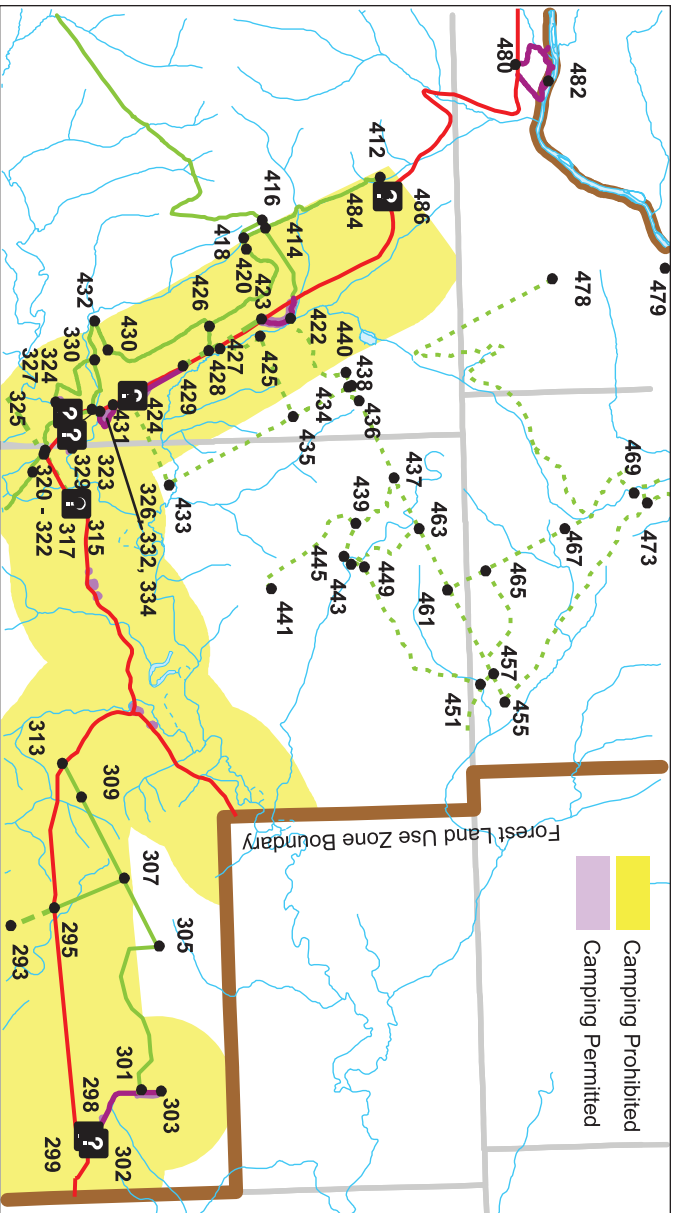

Changes have been made to designated trails and camping sites in this area to support land reclamation, improve long-term sustainability and enhance your outdoor experience.

Look for trail use and camping permitted indicators and follow posted direction.

Individuals failing to comply with posted signs and notices may be fined according to Forest Recreation Regulations

## Camping Nodes Are Now In Effect

### Look for the sign!

This sign designates areas that are approved for random camping activity.

Use of designated camping areas is required. No camping outside of these nodes is permitted within the Stud Creek/Shell Burnt Timber gas plant access area.

Designated camping areas have been designed to reduce recreational pressure on the surrounding landscape and help visitors avoid accidental contact with sour gas lines buried nearby.

ISBN: 978-0-7785-9763-6 (Printed Version)  
978-0-7785-9764-3 (Online Version)

Printed August 2011  
Pub No. 1/559

Government of Alberta

### KNOW THE RULES

Off-highway vehicles may use only designated trails.

Use bridges provided.

Camp only in designated nodes.

Never leave your campfire unattended.

Do not wash vehicles in creeks and streams.

Take your garbage home.

Respect the Land

## Trail Route Change Is Now In Effect

### Look for the sign!

Trail signs indicate the maximum size of motorized vehicle permitted on the route.

The trail along Stud Creek Road is decommissioned. A new trail has been established west of Stud Creek Road.

Designed by riders for riders, the new trail provides more connections to existing trails — greatly enhancing the rider experience.

A partnership of government, industry and volunteers has provided bridges and other improvements on the new trail to further support the area's long-term sustainability

Motorized vehicles are required to use only designated trails at all times within a Forest Land Use Zone.
